

The ACQUIRE Project invites you to an auxiliary event at this year's
Global Health Council Conference:

SUSTAINING LONG-TERM PARTNERSHIPS IN A SHORT-TERM WORLD

Moderated by: Margaret Neuse

Tuesday May 29, 2007 – 5-7 pm
Congressional Room B

Join us for a facilitated discussion about partnerships in today's foreign assistance context. We will examine the challenges of contributing to sustained development within the confines of time-bound projects and what development professionals can do to overcome short-term constraints to achieve lasting partnerships and impact.

Field staff from four of our priority country programs as well as global project colleagues will provide perspectives on the principles and practices that promote effective partnerships and discuss challenges, pitfalls, and what more we can do.

This event is limited to 50 people.
Please RSVP to lbernal@engenderhealth.org

Hosted by:
the ACQUIRE Project,
a USAID project managed by EngenderHealth
